

# CSC 648-848 Spring 2017 M2 Vertical Prototype Checklist

Team **11**

Date **3 / 23 / 2017**

Reviewer Name **Anthony**

## Deployment

Runs from correct directory used for final app deployment **CHECK**

Development code in proper github directory **CHECK**

## Functionality:

Enables tester to specify item keywords and get correct items with all the data (images and thumbnails included)

**CHECK**

## Code and architecture:

Follows MVC; **CHECK**

Chosen PHP and other frameworks installed and used **CHECK**

Data stored in MySQL **CHECK**

Images have thumbnails **NONE FOUND**

Database organization (should be close to final, following M2 data definitions and tables)

**GOOD ENOUGH FOR V-Prototype**

Blobs used for those who committed to them **PATHS USED**

Code documented adequately so others can learn from all this **CHECK**

Good code style and naming conventions **CHECK**

## Search code

Verify what search method is used

**Search is working via like command.**

## Performance

**GOOD**

## Browser compatibility, responsive design

Try 2 different browsers

Resize browsers to check for responsiveness

**CHECK**

## Comments

Prototype looks good.

Database looks unfinished, but is good enough for vertical prototype.
